Boss Tee Cleanout and Test Tee

Product Features:

- Sizes - 3", 4", 6"; No-hub and Hub & Spigot Outlets.
- Safety – contractor not required to remove inflatable plug from inside of stack with 5-15 psi pressure just upstream of the plug.
- Reduces the chance of mold – due to water spilling inside the chase.
- Controlled testing environment – provides contractor with effective means of controlling the filling and draining of piping system.
- Reliability – better testing results because of reliable closure of the stack.
- Time & Material savings – eliminates the inflatable plug in the vertical stack and the time to get it to seal properly.
- Efficient – test up to 3 floors at a time. The inspector can use the gauge to verify pressure in the line.
- Larger, spherical opening in the fitting allows for easy hand access for line testing/inspection/cleaning.
- Cleanout tee remains in the stack after testing to be used for future maintenance and testing.

THE BOSS TEE, CLEANOUT AND TEST TEE

FUNCTION: Used in concealed drainage lines where a cleanout is desired that allows the testing of piping above through the use of an internal threading inside the tee
