COMBINATION GARBAGE CAN WASHER AND DRAIN

FUNCTION: Used in areas where it is desired to wash the interior of garbage and other cans, and prevent the solids from entering the waste line. The exclusive Smith design combines an engineered floor drain with a "single orifice" can washing nozzle. The spray from the nozzle is adjustable from a solid stream to a driving fine mist, providing a means for thoroughly scouring the interior of the can. The slotted sediment bucket catches all debris, and provides ample drainage. "Safe-Set" design insures bucket replacement after cleaning since top grate cannot be inserted unless bucket is in place.
