

- NOTES:
1. It is necessary to ensure the minimum dimensions shown are suitable for the existing ground conditions. Engineering advice may be required.
  2. A minimum concrete strength of 3000 PSI is recommended. The concrete should be vibrated to eliminate air pockets.
  3. The finished level of the concrete surround must be approx. 1/8" (3) above the top of the channel edge.
  4. Refer to SMITH/ACO's latest installation instructions for complete details.
